## RING SIZE GUIDE

Please set the scale of this guide to 100% and print it on an A4 sheet, then use the ruler to find the size that suits you. You can place a credit card over the rectangle below to check that the printed dimensions are accurate. If the length of the card fits within the rectangle, the guide is to the correct scale.

### Measuring with a ring

1. Take the ring you wish to measure.
2. Place it flat on the black circles.
3. Start with the smallest circle and work your way up until the black area fills the entire inside of the ring.

Tip: if you're not sure which size to choose, go for the larger one.
